

Towards a European Workspace ▶

Increasing mobility of students in vocational training in Europe

AIMS

- Ensure international comparison and mutual recognition of vocational qualifications
- Develop a systematic procedure of international transfer of acquired qualifications
- Testing the procedure in the Mechanical Engineering sector
- Focusing on competencies and skills, not years of study

ACHIEVEMENTS

- The VQTS model, an ECVET approach that involves a system of a structured description of work-related competences and their acquisition (including Credit Points)
- A pilot Competence Matrix “Mechatronics” and an interactive tool for the development of Competence Profiles
- Guidelines and instructions for the implementation

Transparency of competences and qualifications
